

## **Bob Donaldson**

### **New SR steam and diesel locos added to my collection**

What a boring time for us all!

Well, I have recently made good use of my spare time and completed a David Andrews Rebuilt Bullied Pacific. Since the workbench photograph was taken it has had footplate lining added and a final paint touch-up. The triple headed line up is led by a DJB kit Battle of Britain Class 34057 'Biggin Hill', then the one I have just finished, West Country Class 34001 'Exeter' and coming up at the rear, Merchant Navy Class 35022 Holland-Afrika Line.

I also recently purchased a new RTR Heljan Class 33 in DRS livery. However, when I received it, to my dismay, it had been painted in the wrong shade of blue – BR blue with DRS transfers. So I have had to do a partial re-spray into the much darker DRS blue, at the same time changing the fragile handrails for metal ones.

And finally I have also just completed the two TTA wagons you can see in the other photograph.
